SUMMARY

Product Designer & UX Researcher with 5+ years shipping user-centered digital products across enterprise SaaS, AI platforms, and consumer applications. *Selected by the University of Maryland* to deploy AI-powered data products to East African government ministries, solutions spanning 9 countries, **32% bounce rate reduction**, and 85x delivery acceleration.

Key outcomes: **40% reduction in user friction**, **167% engagement lift**, and **750+ enterprise users** supported annually; strong collaborator who bridges design, research, and engineering to ship products that drive real business value.

WORK EXPERIENCE

[NASA Harvest](#) | University of Maryland

Nov 2025 - Present

Product Designer & Researcher

College Park, MD

- **Led end-to-end product design** for **AGRA AI AutoPilot** by conducting stakeholder interviews with government analysts & engineers, mapped mental models via **affinity mapping**, and translated user research findings into **progressive disclosure navigation** for a 9-country satellite data product; validated designs through **think-aloud testing** and iterated on information hierarchy to improve data comprehension for non-technical users across 6 East African ministries.
- **Architected 2 Figma design systems from 0-to-1** for a NASA-affiliated research lab, defined design tokens (color, type scale, spacing), built **atomic component libraries** with contribution guidelines, and shipped in HTML/CSS across 2 live products.
- Selected by the University of Maryland as **lead designer for a government AI onboarding program** in Nairobi, **designed a 5-day curriculum** (learner journeys, task flows, decision frameworks) and facilitated delivery to 30+ senior agricultural officials across 6 East African nations, translating complex AI satellite monitoring tools into accessible, policy-level experiences.
- **Applied content design** to distill multi-signal satellite data (SMAP, NDVI, ESI) into 2 annotated 4-page executive decision frameworks, **presented at an international conference** and adopted by East African food security policymakers.

[MarketCrunch AI](#)

Jun 2025 - Sep 2025

Product Design & UX Research Intern

San Francisco, CA (Remote)

- **Led a comprehensive UX audit** across 20+ fintech screens (Robinhood, Yahoo Finance, TradingView) using Nielsen's 10 usability principles and **conducted semi-structured interviews** with institutional traders to surface mental models and trust factors in AI-generated recommendations, synthesized into design guidelines that **reduced reporting errors by 15%**.
- Designed and **validated high-fidelity prototypes** through moderated **usability testing with 12 enterprise users**, **launching 2 features** that **increased elite plan sales by 40%** along with establishing a scalable design system with component libraries, directly reducing design-to-development hand-off time.
- Improved onboarding flow, dashboard Information Architecture (IA), and data visualization patterns achieving a **167% increase in new user attempts**; applied **Material UI (MUI) design standards** and ensured WCAG 2.1 AA compliance across the product.

[Hack4Impact@UMD](#)

Nov 2024 - May 2025

UX Researcher and Designer

College Park, MD

- **Led generative user research** with the Director of Recruitment through semi-structured interviews and contextual inquiry, synthesized findings via **affinity mapping in Miro** to identify 3 key design opportunities that directly guided the product roadmap.
- **Conducted workflow analysis and stakeholder interviews**, leveraging Power BI and Figma to translate requirements into user-centered **automated BI dashboards** to simplify a 33-page application form into 4 streamlined steps with improved UI.
- **Presented design recommendations** in a stakeholder workshop using quantitative usability testing metrics, demonstrating a **20% increase in task-completion speed**.

[Computacenter](#)

Jan 2023 - Jul 2024

Technical UX Analyst

Bengaluru, IN

- **Designed automated diagnostic dashboards** using ScienceLogic, PowerShell, and Selenium, applied **information design principles** to **reduce MTTR by 40%** for IT support teams.
- **Conducted workflow analysis and stakeholder interviews**, leveraging Power BI and Figma to translate requirements into user-centered **automated BI dashboards** that delivered clearer operational insights for IT teams.

[My Equation](#)

May 2022 - Jun 2023

Market Research Analyst, UI/UX Designer

Ahmedabad, IN

- **Led mixed-methods UX research** using **Double Diamond methodology**, conducted user interviews and competitive analysis that drove **35% revenue growth** through strategic rebranding.

PROJECTS

<u>Transurban Express Lanes</u> UX Research	Sep 2024 - Dec 2024
University of Maryland	College Park, MD
• Conducted mixed-methods UX research using surveys (n=127), semi-structured interviews (n=8), and usability testing to evaluate express lane user experience and identify pain points in toll payment systems. • Applied thematic analysis and affinity mapping to synthesize research findings, identifying critical usability issues in wayfinding, toll transparency, and account management that impacted user trust and adoption. • Developed data-driven design recommendations for improved signage, real-time pricing displays, and mobile app enhancements based on SUS scores and qualitative feedback analysis.	

<u>INFO Faculty Dashboard UX Research</u>	Jan 2025 - May 2025
University of Maryland	College Park, MD
• Conducted contextual interviews with UMD iNFO faculty to understand workload tracking pain points; performed affinity mapping to identify recurring themes. • Synthesized research insights into journey maps and task flows, proposing streamlined dashboard design improving task ownership clarity.	

SKILLS

- **Design:** Human-Centric Design (HCD), Interaction Design, Visual Design, Data Analysis, Prototyping, Information Architecture, Design Systems, Accessibility (WCAG 2.1 & 2.2 AA), Section 508, Usability Testing
- **Research:** Journey Mapping, Card Sorting, In-Depth Interviews, Ethnographic Research, Competitive Analysis, Qualitative & Quantitative Research, Task Analysis, Heuristic Evaluation, Contextual Inquiry, Thematic Analysis, Surveys, A/B Testing, Usability Testing
- **Tools:** Figma, Adobe XD, Photoshop, Illustrator, After Effects, Framer, Webflow, Miro, Notion, Power BI, MUI, QGIS, Tableau, Generative-AI Tools, Claude Code
- **Technical:** HTML/CSS, JavaScript, Python, SQL, QGIS, Git/GitHub, React, Docker

EDUCATION

University of Maryland	Aug 2024 - May 2026
Master of Science, Data Science, Minor in User Experience (UX) Research Methods	College Park, MD, USA
• GPA: 3.85	
SRM Institute of Science & Technology	Jun 2019 - May 2023
Bachelor of Technology, Computer Science & Business Systems	Tech Park, India
• GPA: 3.70	

ACHIEVEMENTS

- **Featured on Wall of Portfolios** - selected among top 30% of submitted portfolios, Apr 2026
- **Co-authored 2 policy briefs** presented at the AGRA Regional Food Balance Sheet International Conference, Nairobi, Kenya - geospatial data visualizations adopted by government ministries across 6 East African nations
- **Guest Speaker & Workshop Facilitator** - HFES Student Chapter, George Mason University; led Figma Prototyping Crash Course for human factors grad students
- **Published in Medium’s Bootcamp publication** - “Why UX Designers Matter More Than Ever in the Age of AI”, Mar 2025
- **Creative Award of the Year** - Computacenter, 2024
- **Microsoft MLSA – Vinci Di UI Design Challenge, Winner – 2019**
